

Problem: Anna has her Student number but he needs to create a Gmail Account because the password of her SIS Account will send there for her to see her grades every end of the school semester.

STEP 1: Start

STEP 2: Think a variable to create a Gmail Account

STEP 3: Ask the user for an Gmail Account

STEP 4: Store the response in the variable

STEP 5: Check if it is valid

STEP 6: Not valid? Go back to step 3

STEP 7: If it is valid go to the website of your school and go to SIS account

STEP 8: Go to forget password

STEP 9: Write your name, surname and your Gmail Account

STEP 10: Check if there is a message about of your password on your Gmail Account

STEP 11: If none! Go back to steps 7, 8, 9 and 10

STEP 12: If yes! Go back to step 7 then indicate Student number and your password

STEP 13: End
